SIGNOFF CHECKLIST FOR ACCEPTANCE BY FIRE DEFENDER

Regardless of whether you are a DIY applicator or a qualified painter, in order for Trend Shield Pty Ltd ACN 120 815 376 trading as Fire Defender (**Fire Defender**) to be confident that the work has been done correctly and approve a signoff on this project, Fire Defender requires the following information be supplied. Failure to supply this information will mean that this project will not be signed off by Fire Defender and the Fire Engineer will reject the job as completed.

Failure to meet these requirements will mean Fire Defender will need to come on site and take multiple dry-film-thickness readings for all surfaces to confirm correct application thickness. This will be at the customers cost – starting at \$3000.00.

For the avoidance of doubt, Fire Defender is not liable for any loss or damage whatsoever if the customer has not completed the job and Fire Defender or its Fire Engineer do not sign off on the job. Even if Fire Defender or its Fire Engineer sign off on a job as complete, Fire Defender’s liability is limited pursuant to Fire Defender’s terms and conditions. In the event of any inconsistency with the terms and conditions and this acceptance document, the terms and conditions shall prevail.

1. You are required to apply the product atmicrons wet-film-thickness, was this achieved?
Answer.....
2. You have been supplied the correct amount of product for the surface area that you declared needs to be coated, plus an extra 10% just in case you over apply. You should not have any more than 10-12% product left over – if any. How much product did you have left over? Answer.....
3. As you apply the product, you are required to take wet-film-thickness readings of each coat to ensure you reach the required “total wet film thickness”. Has this been done? Answer.....
4. Photos of each wet-film-thickness reading for each surface is required to be submitted with this document. Has this been done? Answer.....
